INDEX – TARTALOM

Š. A. Alimov—I. Joó, On the Riesz-summability of eigenfunction expansions 5
T. Ando, An inequality between symmetric function means of positive operators 19
M. Arató, Round-off error propagation in the integration of ordinary differential equations by one-step methods 23
Д. З. Аров—М. Г. Крейн, О вычислении энтропийных функционалов и их минимумов в неопределенных проблемах продолжения 33
V. O. Asatiani—Z. A. Chanturia, The modulus of variation of a function and the Banach indicatrix 51
H. Bercovici—L. Kérchy, Quasisimilarity and properties of the commutant of C_{11} contractions 67
J. Bognár, A proof of the spectral theorem for J-positive operators 75
P. L. Butzer—D. Schulz, The random martingale central limit theorem and weak law of large numbers with o-rates 81
I. Ciorănescu—L. Zsidó, Analytic generators for one-parameter cosine families 95
B. Csákány, Three-element groupoids with minimal clones 111
E. Csáki—P. Révész, A combinatorial proof of a theorem of P. Lévy on the local time 119
Á. Császár, Semigroups of continuous functions 131
S. Csörgő—V. Totik, On how long interval is the empirical characteristic function uniformly consistent? 141
J. Dixmier, Série de Poincaré et système de paramètres pour les invariants des formes binaires 151
E. Durszt, On contractive ϱ-dilations 161
C. Foiaş—A. E. Frazho, A note on unitary dilation theory and state spaces 165
F. Gécseg, On a representation of deterministic frontier-to-root tree transformations 177
I. Gohberg—L. Rodman, Analytic operator valued functions with prescribed local data 189
K. Gustafson, The RKNG (Rellich, Kato, Sz.-Nagy, Gustafson) perturbation theorem for linear operators in Hilbert and Banach space 201
I. Halperin, Von Neumann's coordinatization theorem 213
L. Hatvani, On partial asymptotic stability and instability. I 219
J. Horváth, The behavior of the Riesz representation theorem with respect to order and topology 233
A. P. Huhn, On the representation of distributive algebraic lattices. I 239
J.-P. Kahane, Sur la structure circulaire des ensembles de points limites des sommes partielles d'une série de Taylor 247
I. Kátai, On arithmetic functions with regularity properties 253
V. Komornik, Upper estimates for the eigenfunctions of higher order of a linear differential operator 261
A. Kósa, On the homotopy type of some spaces occurring in the calculus of variations 273
I. Kovács, Dilation theory and one-parameter semigroups of contractions 279
H. Langer, On measurable Hermitian indefinite functions with a finite number of negative squares 281
L. Leindler—H. Schwinn, On the strong and extra strong approximation of orthogonal series 293
А. Ф. Леонтьев, Представление функций в выпуклых областях обобщенными рядами экспонент 305

L. Lovász, Self-dual polytopes and the chromatic number of distance graphs on the sphere ... 317
J. Mogyoródi—T. F. Móri, Necessary and sufficient condition for the maximal inequality of convex Young functions ... 325
F. Móricz, Extension of Banach's principle for multiple sequences of operators ... 333
P. T. Nagy, Non-horizontal geodesics of a Riemannian submersion ... 347
F. Schipp, On a Paley-type inequality ... 357
Z. Sebestyén, Moment problem for dilatable semigroups of operators ... 265
J. Szabados—R. S. Varga, On the overconvergence of complex interpolating polynomials. II . 377
J. Szenthe, On symplectic actions of compact Lie groups with isotropy subgroups of maximal rank ... 381
J. M. Szűcs, Some weak-star ergodic theorems ... 389
L. Takács, Random walk on a finite group ... 395
K. Tandori, Über einen Zusammenhang zwischen der Grössenordnung der Partialsummen der Fourierreihe und der Integrabilitätseigenschaft der Funktionen ... 409
V. Totik, Solutions to three problems concerning the overconvergence of complex interpolating polynomials ... 415
P. Vértesi, One-sided convergence conditions for Lagrange interpolation based on the Jacobi roots ... 419
D. Voiculescu, Asymptotically commuting finite rank unitary operators without commuting approximants ... 429
